

Machine Shop Class Offers Free Training

Many opportunities exist for high paid employment in machine shops for both men and women. Free training is now available in machine shop benching operations, lathe and milling machines, shaper and drill press operation. This Adult Education class meets every Monday, Tuesday and Wednesday evening from 6:30 to 10 in the Machine Shop of the Torrance High School. Thomas Bray, the instructor, stated today he has successfully placed many women as well as men in local industry.

Homeowners

divider should pay \$7,000 which would be applied on the bonded indebtedness of Heights homeowners for the sewer.

However, it seems that there was a loop-hole left someplace in the law, because Victoria Enterprises Inc., builders of the tract, has indicated through their agents that they do not intend to contribute any \$7,000. In fact, they have indicated they will take the case to court if necessary.

The builders claim immunity from the hook-up fee under the terms of an easement granted to the city at the time of the sewer installation.

The easement it has been reported, was not drawn up by the city's legal dept., but rather by the owners of the land.

An investigation of the terms of the easement is being investigated now by the city, and it is anticipated that the residents of Seaside Heights will be told whether or not they can rely on the promise of the Council that they would be reimbursed part of the high cost of their sewers at some time in the very near future.

Industrial contribution in the 1951 campaign.

Torrance's campaign this year has been broken down into five phases. Two of these—advance gifts and commerce and industry—are nearing an end. The remaining three—public employees, residential and business—will be handled in a one-day drive, similar to the highly successful drive staged last year, Levy disclosed.

This year's campaign goal has been set at \$12,864, \$411 higher than last year's.
